Karnataka Startup Policy

Rural Development

The Project, Establishment of a Nutra-Phyto Incubation Centre & Common Instrumentation Facility was for nurturing entrepreneurs in the area of nutraceuticals and functional foods in the country. The entrepreneurs/incubatees will have access to state-of-art facilities for basic research, scale-up and commercialization all through a single point of access. It is an opportunity to explore and innovate ideas into a commercial technology by start-up ventures and SMEs. A selection cum Project Review Monitoring committee consisting of experts from industry and academia will be assisting in successfully managing the activities of the Project.
